

## T.J. Williams

Mr. Williams was extremely helpful during our entire visit. After the conclusion of the forum, there was time to discuss several topics with him. Mr. Williams echoed many of the views we had heard from others, including concerns over taxes, education, civil rights and much more. Mr. Williams expressed his desire to see current programs or new programs put in place to help lower income people help themselves. What so many people want is an opportunity to better improve their situations and provide for their families. There are too many people that feel they have no where to turn for assistance as many of the current systems have failed to assist them. Thank you for taking time to discuss so many issues and expressing your concerns and ideas.
